printOn24

Upload Page: SEO, AEO and GEO Content Pack

Page: https://printon24.in/upload (public Upload and Print page)
Covers: 26 SEO topics, 14 AEO topics, 18 GEO topics
Prepared: 29 October 2026

How to use this document. Text in [square brackets] is a placeholder to replace with real data (for example the maximum file size). Do not publish invented numbers, ratings or reviews. IMPORTANT: the Upload screen inside the app (customer name, upload progress, queued documents, Needs Config, live estimate, Send for Print and Pay) is a private, session-based tool and must not be the indexed page. This content is for a separate public, crawlable Upload and Print page (clean URL /upload with no shop code). The version opened from a shop link, /upload?shop=PUNE-HE-01, is noindex and its canonical points to /upload. The app UI and functionality are not changed. Facts come from the approved screens: Upload Document, drag and drop, Choose Files, PDF/Word/Excel/PPT/Images, upload progress, Queued Print Documents, Add Another File, preview (eye) and delete, Needs Config, Print Configuration (paper size, print side, print type, copies, layout, page range, pages per sheet), Estimate Total (Live Calculated), Send for Print and Pay, Featured Offers and Ads (Sponsored), and the image editor (A4 canvas, Print Area, crop, rotate, brightness, add image, Auto Grid, Zoom and Scale, Center, Fit to Page).

Contents

1. SEO (Search Engine Optimization), topics 1 to 26
2. AEO (Answer Engine Optimization), topics 1 to 14
3. GEO (Generative Engine Optimization), topics 1 to 18
4. Implementation checklist

1. SEO (Search Engine Optimization)

1. Meta Title

The title is the clickable headline in Google results. Keep it near 60 characters, put the main keyword first, brand last.

Recommended:

```
Upload and Print Online - PDF, Word, Excel, PPT, Images | printOn24
```

Alternatives:

- Upload Document and Print at a Nearby Shop | printOn24
- Print PDF and Word Files Online - Set Options, See Price | printOn24
- Upload and Print: Choose A4, Colour, Copies and Pages | printOn24

The title must differ from the Home title. Do not add the shop name to the generic /upload title.

2. Meta Description

Aim for 140 to 160 characters, state the benefit and give a reason to click.

Recommended:

```
Upload PDF, Word, Excel, PPT or images, choose paper size, colour, copies and pages, see the live
    price and send your print order to a nearby shop.
```

Alternatives:

- Upload your file, set print options and see the total before you pay. Send it to a partner print shop and collect with a token.
- Print any document online: drag and drop files, pick A4, colour or B&W, and place your order in minutes.

3. Primary Keywords

Keyword	Intent	Where to use
upload and print online	Transactional	Title, H1, intro
print documents online	Transactional	H1/H2, body
upload document to print	Transactional	Hero, upload section
print PDF online	Transactional	File types section
online print order	Transactional	Price and order section
printOn24 upload	Brand	Title, schema, breadcrumbs

4. Secondary Keywords

- print Word document online
- print PowerPoint online
- print Excel sheet online
- print images online
- multiple file print order
- drag and drop file upload print

- live print price calculator
- print cost estimate online
- A4 print online
- colour or black and white print online
- double side print online
- print selected pages online
- print page range online
- 2-in-1 and 4-in-1 print
- print copies online
- print preview before ordering
- photo collage print A4
- image editor for printing
- print and pay online
- send file to xerox shop

5. Long-Tail Keywords

- how to upload a PDF and print it at a nearby shop
- upload multiple documents and print in one order
- can I print only selected pages of a Word file online
- how to print two pages on one sheet online
- print colour and black and white from the same upload
- see print price before paying online
- print photos on one A4 page from my phone
- how to print a PowerPoint as handouts 4 per page
- print assignment online and pick up at college xerox shop
- upload document and pay on counter
- edit image placement before printing online
- how much does it cost to print 7 pages in colour
- what does needs config mean when uploading a document to print
- print landscape document online

6. H1, H2 & H3 Headings

```
H1: Upload and Print Your Documents Online
  H2: How to Upload and Print on printOn24
    H3: Step 1 - Choose Your Print Shop
    H3: Step 2 - Upload Your Files
    H3: Step 3 - Set Your Print Options
    H3: Step 4 - Check the Live Price
    H3: Step 5 - Send for Print and Pay
  H2: Supported File Types
    H3: PDF
    H3: Word Documents
    H3: Excel and PowerPoint
    H3: Images
  H2: Upload More Than One File
```

```
H2: Print Configuration Options
  H3: Paper Size
  H3: Single Side or Back to Back
  H3: Colour or Black and White
  H3: Number of Copies
  H3: Portrait or Landscape
  H3: Page Range: All, Selected or Custom
  H3: Pages Per Sheet: 1-in-1, 2-in-1, 4-in-1
H2: Live Price Estimate
H2: Image Editor for Photos and Collages
H2: Preview, Edit or Remove a File
H2: Privacy and Document Deletion
H2: Upload Page FAQs
H2: Related Pages
```

7. Upload Page Content Optimization

Complete public page copy. Target 1,400 to 1,900 words with the interactive upload tool (or a button into it) placed near the top.

Hero

H1: Upload and Print Your Documents Online

Upload your PDF, Word, Excel, PowerPoint or image files, choose how you want them printed and see the exact price before you pay. Your order goes straight to the print shop you select, and you collect it with a token when it is ready. Buttons: Upload a Document, Find a Print Shop.

How to upload and print on printOn24

1. Choose your print shop. Open a shop link, scan its QR code or search by name. The shop is shown at the top of the page, for example Hitesh Enterprises, Connected, with its shop code.
2. Upload your files. Drag and drop files or tap Choose Files. Select several files at once or add them one by one. A progress bar shows the file being uploaded and its page layout being checked.
3. Set your print options. Each queued file shows its pages, copies, paper size and price. Files that still need choices are marked Needs Config until you finish.
4. Check the live price. The Estimate Total shows total pages, total copies and the final amount, and updates as you change options.
5. Send for Print and Pay. Confirm and send the order to the shop. You get a pickup token and a digital receipt.

Supported file types

printOn24 supports PDF, Word, Excel, PowerPoint and image files. After upload, the system inspects the page formats so the page count and price are accurate. [Maximum file size: add real limit.] [Maximum files per order: add real limit.]

Upload more than one file

Use Add Another File to build one order with several documents. Every file appears in the Queued Print Documents list with its own page count, settings and price. You can preview a file with the eye icon or remove it with the delete icon. One file is the Active Document that you are configuring right now.

Print configuration options

Option	Choices	Why it matters
Paper Size	A4 (Standard 210 x 297 mm) and other sizes the shop offers	Sets the paper and the price
Print Side	Single Side, Back to Back	Back to Back saves paper
Print Type	Colour, Black and White	Black and White is usually cheaper

Option	Choices	Why it matters
Copies	Number of print sets (plus and minus buttons)	Each set is a full copy of the document
Layout	Portrait, Landscape	Match your document orientation
Page Range	All Pages, Selected Pages, Custom Range	Print only what you need
Pages Per Sheet	1-in-1, 2-in-1, 4-in-1	Sheet compression for notes and slides

Live price estimate

The Estimate Total card is marked Live Calculated. It lists Total Pages, Total Copies and Final Total. For example, a 7-page document with 2 copies showed a final total of Rs 70.00 at the shop in the design. Real prices depend on the selected shop rates and options.

Image editor

For photos, ID layouts and collages, open the image editor. Place up to four images on an A4 canvas, drag and resize them inside the dotted Print Area, use Auto Grid for an even layout, crop, rotate, adjust brightness, centre an image or fit it to the page, and switch the preview between mobile and desktop. The image list shows each image with its position and rotation.

Privacy

Uploaded files are kept in encrypted cloud storage and automatically deleted within 12 hours, as stated in the Privacy Policy.

Sponsored offers

The page may show a Featured Offers and Ads block labelled Sponsored. Sponsored content is clearly marked and does not change your print price.

On-page rules: primary keyword in the first 100 words, natural language, short paragraphs, descriptive subheads, no hidden text, no keyword repetition.

8. Service-Based Keywords

Service	Keyword variants
Document upload	upload document to print, upload file print order, drag and drop print upload
PDF printing	print PDF online, PDF print near me, print selected pages from PDF
Word / DOCX printing	print Word document online, print docx near me
Excel and PPT printing	print Excel sheet online, print PowerPoint handout 4 per page
Image printing	print photo online, print images on one page, passport photo layout print
Colour printing	colour print online, colour printout near me
B&W printing	black and white print online, B&W xerox online
Double side printing	back to back print online, duplex print order
Multi-page layouts	2-in-1 print, 4-in-1 print, sheet compression
Copies	multiple copies print online, bulk copies print order
Price estimate	print cost calculator, live print price

9. Image SEO (Alt Tags, Image Names)

Image	File name	Alt text
Upload screen	upload-document-drag-and-drop.webp	Upload Document screen with drag and drop and Choose Files button on printOn24
Upload progress	file-upload-progress-bar.webp	File upload progress bar showing a Word document being uploaded
Queued files	queued-print-documents-list.webp	Queued print documents with page count, paper size and price
Print configuration	print-configuration-paper-size-copies.webp	Print configuration with paper size, print side, colour, copies and layout
Page range	page-range-pages-per-sheet.webp	Page range and pages per sheet options on printOn24
Price estimate	live-print-price-estimate.webp	Live estimate showing total pages, copies and final total
Send button	send-for-print-and-pay.webp	Send for Print and Pay button after setting print options
Image editor	image-editor-a4-canvas-auto-grid.webp	Image editor with three images placed on an A4 print area
Editor zoom	image-editor-zoom-scale-fit-to-page.webp	Image editor zoom and scale slider with Center and Fit to Page
OG image	upload-page-1200x630.png	Upload and print online with printOn24

- WebP or AVIF under 150 KB, with width and height attributes.
- Lazy-load all but the first image; hero uses fetchpriority="high".
- Alt text describes what the screen shows; do not repeat keywords.
- Redact real names (for example Sanket Jadhav) and personal photos from screenshots used publicly.
- Add captions under screenshots; captions are read by search and AI systems.

10. Meta Tags

```
<html lang="en-IN">
<meta charset="utf-8">
<meta name="viewport" content="width=device-width, initial-scale=1">
<title>Upload and Print Online - PDF, Word, Excel, PPT, Images | printOn24</title>
<meta name="description" content="Upload PDF, Word, Excel, PPT or images, choose paper size,
    colour, copies and pages, see the live price and send your print order to a nearby shop.">
<meta name="author" content="printOn24 Technology Pvt. Ltd.">
<meta name="theme-color" content="#FF1200">
```

11. Open Graph Tags

```
<meta property="og:type" content="website">
<meta property="og:site_name" content="printOn24">
<meta property="og:title" content="Upload and Print Your Documents Online | printOn24">
<meta property="og:description" content="Drag and drop your files, set print options and see the
    price before you pay.">
<meta property="og:url" content="https://printon24.in/upload">
<meta property="og:image" content="https://printon24.in/og/upload-1200x630.png">
<meta property="og:image:width" content="1200">
<meta property="og:image:height" content="630">
<meta property="og:image:alt" content="printOn24 upload and print screen">
<meta property="og:locale" content="en_IN">
```

12. Twitter/X Card Tags

```
<meta name="twitter:card" content="summary_large_image">
```

```
<meta name="twitter:title" content="Upload and Print Your Documents Online | printOn24">
<meta name="twitter:description" content="Upload files, set options, see the live price and send
    to a nearby print shop.">
<meta name="twitter:image" content="https://printon24.in/og/upload-1200x630.png">
<meta name="twitter:image:alt" content="printOn24 upload and print screen">
<meta name="twitter:site" content="@[handle]">
```

13. Canonical URL

```
<link rel="canonical" href="https://printon24.in/upload">
```

- Canonical for /upload is the clean URL.
- /upload?shop=PUNE-HE-01 and any ?utm_ parameters also carry canonical https://printon24.in/upload.
- Never make each shop deep link its own canonical; shop pages (/shops/pune/slug) are the pages that rank for shops.

14. Robots Meta Tag

Public /upload page:

```
<meta name="robots" content="index, follow, max-image-preview:large, max-snippet:-1">
```

Shop deep link /upload?shop=CODE and the logged-in app upload route:

```
<meta name="robots" content="noindex, follow">
```

> Do not block /upload? in robots.txt. If a URL is blocked, Google cannot read its noindex or canonical tag. Use the meta tag instead. This corrects the Disallow: /upload? line in the earlier Home page pack.

15. XML Sitemap

```
<url>
  <loc>https://printon24.in/upload</loc>
  <lastmod>2026-10-29</lastmod>
  <priority>0.9</priority>
</url>
```

- Add only the clean /upload URL; never list ?shop= variants.
- Update lastmod only when content changes.
- Resubmit the sitemap in Search Console after adding the page.

16. Robots.txt

```
User-agent: *
Allow: /
Allow: /upload
Disallow: /app/
Disallow: /checkout
Disallow: /receipt
Disallow: /api/

Sitemap: https://printon24.in/sitemap.xml
```

Uploaded files and user documents are never publicly accessible; they sit behind authenticated storage and are not linked from any public page.

17. Internal Linking

From Upload page	To	Anchor text
Intro	/	printOn24 home
Step 1	/shops	Find a print shop

From Upload page	To	Anchor text
Step 1	/shops/pune	Print shops in Pune
Supported file types	/print-pdf-online	Print PDF online
Print options	/how-it-works	See the full printing process
Image editor	/features/image-editor	Image editor for printing
Price	/faq#price	How print prices are calculated
Privacy	/privacy-policy	Privacy Policy
After sending	/faq#token	What is a pickup token?

Links in: Home hero and How it Works, every shop page ("Upload and Print here"), the Features page and the FAQ. Use real <a href> anchors so crawlers can follow them.

18. Technical SEO

- **Split the page:** a crawlable HTML section with the content above plus the interactive uploader. The uploader itself needs no indexing.
- **Pre-render** the public page (Next.js SSR/SSG, vite-plugin-ssg, react-snap or a prerender service) so text and tags are in the first HTML response.
- **Head management** with react-helmet-async or Next.js Metadata.
- **Clean routing:** /upload for public, ?shop= handled client-side after load.
- **Never index personal states:** customer name, uploaded file names, queued documents and receipts are rendered client-side only and are never in server HTML.
- **Uploads security:** HTTPS, virus scan, size and type validation, signed URLs, 12-hour purge job.
- **Status codes:** 200 for the page; 301 old URLs; no soft 404.
- **Accessibility:** labels on inputs, keyboard-accessible Choose Files, alt text, sufficient colour contrast (also helps SEO).

19. Mobile SEO

- Most uploads happen on phones; the content must match desktop.
- Choose Files button at least 44 px high and visible without scrolling.
- Support camera and gallery pickers on mobile browsers.
- Avoid sticky elements covering the bottom tab bar or the Send for Print and Pay button.
- Keep text 16 px or larger; no horizontal scrolling.
- Test Lighthouse mobile and real devices on 4G.
- App deep links: Android App Links and iOS Universal Links open /upload?shop=CODE in the app with the shop preselected.

20. Page Speed Optimization

Metric	Target
LCP	under 2.5 s
INP	under 200 ms
CLS	under 0.1

- Load the uploader lazily after the content paints.
- Lazy-load the image editor and any canvas library only when the editor opens.
- Compress screenshots to WebP and size them for mobile.
- Self-host fonts with font-display: swap.
- Upload files directly to storage with chunked or resumable uploads; show progress.
- Cache static assets via CDN; defer analytics and ad scripts.
- Reserve space for the Featured Offers and Ads block to avoid layout shift.

21. URL Structure

```
/upload                              Public Upload and Print page (indexable)
/upload?shop=PUNE-HE-01              Shop deep link (noindex, canonical /upload)
/print-pdf-online                    Supporting page (optional)
/print-word-document-online          Supporting page (optional)
/features/image-editor               Feature page (optional)
/shops/pune/yash-enterprises         Shop page with Upload button
```

- Use /upload, not /upload-page or /upload.html.
- Lowercase, hyphens, no IDs.
- Keep the shop code in the query string only.
- Add 301 redirects if the route changes.

22. Structured Data / Schema Markup

```
{
 "@context":"https://schema.org",
 "@graph":[
  {"@type":"WebPage","@id":"https://printon24.in/upload#page",
   "url":"https://printon24.in/upload",
   "name":"Upload and Print Online | printOn24",
   "isPartOf":{"@id":"https://printon24.in/#website"},
   "inLanguage":"en-IN"},
  {"@type":"BreadcrumbList","itemListElement":[
    {"@type":"ListItem","position":1,"name":"Home","item":"https://printon24.in/"},
    {"@type":"ListItem","position":2,"name":"Upload and
    Print","item":"https://printon24.in/upload"}]},
  {"@type":"HowTo","name":"How to upload and print a document online",
   "step":[{"@type":"HowToStep","name":"Choose your print shop"},
           {"@type":"HowToStep","name":"Upload your files"},
           {"@type":"HowToStep","name":"Set print options"},
           {"@type":"HowToStep","name":"Check the live price"},
           {"@type":"HowToStep","name":"Send for print and pay"}]},
  {"@type":"WebApplication","name":"printOn24 Upload and Print",
   "applicationCategory":"BusinessApplication","operatingSystem":"Web, Android, iOS",
   "featureList":["PDF, Word, Excel, PowerPoint and image upload",
     "Multiple files per order","Paper size, sides, colour, copies, layout",
     "Page range and pages per sheet","Live price estimate","Image editor"],
   "publisher":{"@id":"https://printon24.in/#org"}},
  {"@type":"FAQPage","mainEntity":[{"@type":"Question",
    "name":"Which files can I upload?",
    "acceptedAnswer":{"@type":"Answer","text":"PDF, Word, Excel, PowerPoint and image
    files."}}]}
 ]}
```

Do not add Product, Offer prices or AggregateRating unless they are real and visible. The FAQPage text must equal the visible FAQ. Validate with the Rich Results Test.

23. Local SEO

- The generic /upload page links to Pune shop pages and campus pages (near PICT, COEP, MIT, Sinhgad).

- Add a "Print shops near you" block listing active shops with area names (from the shared database).
- Each shop page has an Upload and Print button that opens /upload?shop=CODE.
- Keep shop NAP (name, address, phone) identical on shop pages, Google Business Profile and directories.
- Use the shop name only on shop pages, not on the generic upload page title.
- Mention real locality names in copy, for example "print near Zeal College Road, Narhe, Pune" only on the matching shop page.

24. Individual Printing Shop Pages SEO

The upload page and shop pages support each other: shop pages rank for "[shop] print in [area]" and send users to the upload flow with the shop already chosen.

Item	Rule
Shop page CTA	"Upload and Print at [Shop Name]" links to /upload?shop=[SHOP_CODE]
Shop context on upload	Header shows shop name, Connected status and shop code so the user is sure the order goes to the right shop
Indexing	Shop pages are indexable; the ?shop= upload URL is noindex with canonical /upload
Shop page content	Services, rates, timings, address, map, FAQs, LocalBusiness schema
Link back	Upload page links to /shops and /shops/pune; shop pages link to /upload
Inactive vendors	Disconnected shops show a not-available message, shop page noindex/410, and removal from sitemap

25. Google Search Console

1. Verify the domain property (DNS) if not already done.
2. Submit the updated sitemap including /upload.
3. Run URL Inspection on https://printon24.in/upload and request indexing.
4. Confirm Google sees the page as indexable and the ?shop= variants as "noindex" or "alternate with canonical".
5. Check Enhancements for FAQ and HowTo errors.
6. Track queries such as "upload and print", "print pdf online", "print documents online" in Performance.
7. Watch Core Web Vitals for the /upload group.

26. Google Analytics & SEO Performance Tracking

Event	Fires when
upload_page_view	Public /upload viewed (organic landing)
shop_context_loaded	Page opens with ?shop= and shop is shown
upload_start	First file selected or dropped
upload_complete	File reaches 100%
upload_error	Wrong type, too large, or failed upload
add_another_file	Add Another File tapped
config_complete	Needs Config cleared for a file

Event	Fires when
page_range_changed / pages_per_sheet_changed	User changes these options
image_editor_open	Image editor opened
estimate_viewed	Estimate Total visible
send_for_print_click	Send for Print and Pay tapped
order_placed	Order confirmed

KPI	Meaning
Upload start rate	upload_start / upload_page_view
Upload completion rate	upload_complete / upload_start
Config completion rate	config_complete / upload_complete
Order conversion	order_placed / upload_start
Organic share	Orders from Google organic sessions
Top errors	upload_error reasons

Never send file names, customer names or document content to analytics. Send only event names, counts and file type categories.

2. AEO (Answer Engine Optimization)

AEO makes this page the answer in featured snippets, People Also Ask, voice assistants and AI answer boxes. Each answer must stand alone.

1. Frequently Asked Questions (FAQs)

Q: Which files can I upload to print?

You can upload PDF, Word, Excel, PowerPoint and image files. Select several files at once or add them one by one.

Q: Can I upload more than one file in a single order?

Yes. Use Add Another File. Each file appears in the queued list with its own pages, settings and price.

Q: How do I upload a document on printOn24?

Choose your print shop, drag and drop the file or tap Choose Files, wait for the upload to finish, set your print options and tap Send for Print and Pay.

Q: What does Needs Config mean?

Needs Config means the file still needs print options such as paper size, colour, copies or page range. Choose them in Print Configuration and the label clears.

Q: What does Active Document mean?

Active Document is the file you are configuring right now. Select another queued file to change its settings.

Q: How is the print price calculated?

The price depends on the shop rates, paper size, colour or black and white, total pages and copies. The Estimate Total updates live as you change options.

Q: Is the estimate the final price?

The Estimate Total is calculated live from your selections and the shop rates. The final total is shown before you send the order.

Q: Can I print only some pages?

Yes. In Page Range choose All Pages, Selected Pages or Custom Range and enter the pages you need.

Q: What is Pages Per Sheet?

It places more than one page on each sheet. 1-in-1 prints one page per side, 2-in-1 prints two and 4-in-1 prints four, which saves paper.

Q: What is the difference between Single Side and Back to Back?

Single Side prints on one side of each sheet. Back to Back prints on both sides, using fewer sheets.

Q: Can I print in colour and black and white?

Yes. Choose Colour or Black and White under Print Type. The price changes with your choice.

Q: Can I print in landscape?

Yes. Choose Landscape in Layout. Portrait is the default for most documents.

Q: How many copies can I order?

Set any number of copies with the plus and minus buttons. [Maximum copies: add limit.]

Q: Can I preview or remove a file after uploading?

Yes. Use the eye icon to preview a queued file and the bin icon to remove it.

Q: Can I print photos or make a collage?

Yes. Use the image editor to place several images on an A4 page, with Auto Grid, crop, rotate and brightness tools.

Q: Why is the Print Area shown in the editor?

The dotted Print Area shows the part of the page that will be printed. Keep your images inside it so nothing is cut off.

Q: What happens after I tap Send for Print and Pay?

Your order goes to the selected shop. You choose a payment method, get a pickup token and digital receipt, and collect the printout at the shop.

Q: Is my uploaded document safe?

Files are stored in encrypted cloud storage and are automatically deleted within 12 hours.

Q: Do I need to scan a QR code to upload?

No. A shop link or a search by name selects the shop for you. Scanning the QR code or typing the shop code works too.

Q: Are the Featured Offers and Ads part of my order?

No. They are labelled Sponsored and do not change your print price.

2. Question-Based Keywords

Type	Examples
What	what files can I upload to print, what does needs config mean, what is pages per sheet
How	how to upload a PDF to print, how to print selected pages, how to print two pages on one sheet, how to print photos on one page
Where	where can I upload a document to print near me
Can	can I upload multiple files, can I print a Word file online, can I preview before printing
Which	which file formats are supported, which paper size to choose
Why	why is my file still uploading, why does my price change
How much	how much does it cost to print 10 pages in colour

3. Direct Answers to User Queries

- **Query:** how to upload and print a document online. **Answer:** Choose your print shop on printOn24, drag and drop your file, set paper size, colour, copies and page range, check the live price and tap Send for Print and Pay. Collect with your token.
- **Query:** can I print a PDF online without a printer. **Answer:** Yes. Upload the PDF on printOn24, choose your options and send it to a nearby print shop. Collect the printout with a token.
- **Query:** which files can I upload to print. **Answer:** PDF, Word, Excel, PowerPoint and image files.
- **Query:** how do I print 4 pages on one sheet. **Answer:** Set Pages Per Sheet to 4-in-1 in Print Configuration before sending the order.

4. How-to Questions & Answers

How to upload a document and place a print order

1 Open the shop link or choose your shop.

2 Tap Choose Files or drag the file into the upload box.

3 Wait until the progress bar reaches 100 percent.

4 Set Print Configuration for the active document.

5 Check Total Pages, Total Copies and Final Total.

6 Tap Send for Print and Pay.

How to upload several files in one order

1 Upload the first file.

2 Tap Add Another File.

3 Select the next file.

4 Configure each file; Needs Config disappears when done.

5 Review the combined estimate and send.

How to print only selected pages

1 Open Page Range.

2 Choose Selected Pages or Custom Range.

3 Enter the pages, for example 1-3, 7.

4 Check that Total Pages and price updated.

How to print double sided and save paper

1 Set Print Side to Back to Back.

2 Set Pages Per Sheet to 2-in-1 or 4-in-1.

3 Choose Black and White if colour is not needed.

How to make a photo collage for printing

1 Open the image editor.

2 Tap Add and select images.

3 Tap Auto Grid or drag and resize each image.

4 Use Fit to Page or Center if needed.

5 Confirm A4 size and send the order.

How to remove or preview a file

1 Find the file in Queued Print Documents.

2 Tap the eye icon to preview.

3 Tap the bin icon to remove it.

5. Service-Related Questions & Answers

Question	Answer
Which paper sizes can I choose?	A4 (210 x 297 mm) is shown by default; other sizes depend on the shop.
Can I choose double sided printing?	Yes, with Back to Back.
Can I print Excel sheets?	Yes, Excel files are supported.
Can I print PowerPoint slides 4 per page?	Yes, set Pages Per Sheet to 4-in-1.
Can I change settings after uploading?	Yes, until you send the order.
Can I mix colour and B&W files?	Each file has its own configuration, so you can set different options per file.

Question	Answer
Can I see the price before paying?	Yes, the live estimate and final total are shown before you send the order.
Can I print an image at full page?	Yes. Add the image in the editor and use Fit to Page.

6. Conversational Search Queries

- "How do I upload a PDF to print at a shop near me?"
- "I have a Word file, how can I get it printed today?"
- "Can I print 20 pages in black and white double sided from my phone?"
- "How do I print four slides on one page?"
- "Is there a website where I upload a document and pay at the shop?"
- "Print only pages 3 to 8 of my PDF online"
- "Why does my document say needs config?"

7. Featured Snippet Optimization

- **Paragraph:** a 40 to 50 word definition under the H2 "How to Upload and Print on printOn24".
- **List:** the five numbered steps.
- **Table:** print options and their choices (see section 7 of SEO).

Option	Choices
Paper size	A4 and shop-supported sizes
Print side	Single Side, Back to Back
Print type	Colour, Black and White
Layout	Portrait, Landscape
Page range	All Pages, Selected Pages, Custom Range
Pages per sheet	1-in-1, 2-in-1, 4-in-1

8. Clear and Concise Answers

- Answer first, explain second.
- 40 to 60 words per answer, 5 to 8 items per list.
- Use the same words as the interface: Choose Files, Add Another File, Needs Config, Print Configuration, Estimate Total, Send for Print and Pay.
- Avoid long introductions and marketing language.
- One answer per question.

9. Structured Content & Headings

- Question or task in H2/H3, answer immediately below.
- Steps in ordered lists; options in tables; features in bullets.
- Anchor IDs: #how-to-upload, #file-types, #print-options, #price, #image-editor, #faq.
- One topic per section, 80 to 200 words.
- Place the uploader above the fold and the explanation directly below it.

10. FAQ Content Optimization

- Keep FAQs visible in HTML and match the FAQPage schema.
- Group by theme: Files, Print options, Price, Image editor, Privacy, After ordering.
- Use real user questions from support and Search Console.
- Review quarterly and update when features change.
- Link answers to deeper pages (How it Works, Features, Privacy).
- Add the last-updated date.

Group	Example questions
Files	file types, multiple files, preview, delete
Print options	sides, colour, copies, layout, page range, pages per sheet
Price	estimate, final total, what changes the price
Image editor	collage, Auto Grid, Print Area, Fit to Page
Privacy	12-hour deletion, encryption
After ordering	token, receipt, status, collection

11. Search Intent Optimization

Intent	Example search	Page element
Transactional	upload and print online	Uploader and CTA at top
Informational	how to print selected pages	How-to steps and FAQ
Commercial	online print price calculator	Live price section
Local	upload document print shop near me	Shop block and /shops link
Troubleshooting	needs config meaning	FAQ and glossary
Navigational	printOn24 upload	Breadcrumb and Home link

12. Semantic Keywords

- upload, drag and drop, choose files, file inspection, progress, queue, queued documents
- active document, needs config, configuration, preview, remove
- paper size, A4, 210 x 297 mm, single side, back to back, duplex
- colour, black and white, copies, print sets, portrait, landscape, orientation
- page range, selected pages, custom range, pages per sheet, sheet compression
- estimate, live calculated, total pages, final total, send, pay, token, receipt
- image editor, canvas, print area, crop, rotate, brightness, auto grid, zoom, scale, centre, fit to page
- PDF, DOCX, Excel, PPT, JPG, PNG, partner shop, shop code

13. User Problem-Based Content

User problem	Content answer
Not sure the file will print correctly	Preview the file with the eye icon before sending

User problem	Content answer
Unsure of the price	Estimate Total updates live with every change
Only needs a few pages	Use Selected Pages or Custom Range
Wants to save paper or money	Back to Back, 2-in-1 or 4-in-1, Black and White
Has many documents	Add Another File and one combined order
Wants photos on one page	Image editor with Auto Grid
Worried about privacy	12-hour deletion and encrypted storage
Large file seems stuck	Progress bar; retry; [maximum size guidance]
Chose the wrong shop	Check the shop name and code at the top before sending

14. Question-Based Content Structure

```
H2: What does Needs Config mean?
Direct answer:
  Needs Config means the file still needs print options. Choose paper size,
  colour, copies and page range and the label clears.
Details:
  1. Select the file  2. Open Print Configuration  3. Set options
Related link:
  /upload#print-options
```

3. GEO (Generative Engine Optimization)

GEO helps AI assistants and AI search describe printOn24 and its upload feature correctly. AI systems quote clear, consistent and verifiable text.

1. Brand Description

printOn24 is an Indian online printing platform that connects customers with partner print and xerox shops. Users upload documents, choose print settings and send orders to a nearby shop, then collect the printout with a pickup token.

2. Short Brand Description

printOn24 lets you upload documents online, set print options, see a live price and print at a nearby partner shop.

Upload page one-liner: Upload PDF, Word, Excel, PowerPoint or images, set options, see the price and send to a nearby print shop.

3. Detailed Brand Description

printOn24 is an online printing platform from printOn24 Technology Pvt. Ltd., based in Pune, Maharashtra, India. On the Upload page, a customer sees the connected print shop and its shop code, enters a customer name, and drags and drops files or chooses files from the device. The platform supports PDF, Word, Excel, PowerPoint and image files, accepts several files in one order, shows an upload progress bar while it inspects the page formats, and lists each file in a queue with its page count, paper size and price. For each file the customer sets paper size, single or back to back printing, colour or black and white, copies, portrait or landscape, page range (all, selected or custom) and pages per sheet (1, 2 or 4). The Estimate Total updates live with total pages, total copies and the final total. A built-in image editor lets the customer arrange several images on an A4 page with Auto Grid, crop, rotate, brightness, zoom, centre and fit-to-page tools. After pressing Send for Print and Pay, the order goes to the selected shop and the customer receives a pickup token and digital receipt. Uploaded files are encrypted and deleted within 12 hours.

4. Brand Entity Information

Field	Value
Brand	printOn24
Legal name	printOn24 Technology Pvt. Ltd.
Product feature	Upload and Print (document upload, print configuration, live estimate, image editor)
Category	Online printing platform
Headquarters	Pune, Maharashtra, India
Address	[registered address]
Website	https://printon24.in
Upload page	https://printon24.in/upload
Email	info@hrsactech.in
Phone	+91 9284289782 (7 days a week)
Technology partner	High Resolution Software and Coding
Platforms	Web, Android, iOS

Field	Value
Social profiles	[LinkedIn] [Instagram] [X] [Facebook] [YouTube]

5. Brand Name Consistency

- Always write printOn24 (lowercase p, uppercase O, no spaces).
- Name features exactly as in the interface: Upload Document, Choose Files, Add Another File, Print Configuration, Estimate Total, Send for Print and Pay, Image Editor.
- Do not alternate between "queue", "basket" and "cart"; use "Queued Print Documents".
- Use the same brand name in schema, titles, alt text, app store text and social posts.

6. Business Category & Service Information

Item	Detail
Category	Online printing service
Feature	Document upload and print order creation
Inputs	PDF, Word, Excel, PowerPoint, images
Options	Paper size, print side, print type, copies, layout, page range, pages per sheet
Output	Order sent to a partner shop, pickup token, digital receipt
Price	Live estimate based on the shop rates and options
Payment	As enabled by the shop, such as Pay on Counter
Area	Pune, Maharashtra

7. Target Audience Information

- Students who print assignments, notes, lab reports and slides.
- Job seekers printing resumes and certificates.
- Professionals and small offices printing everyday documents.
- Photo and ID users who need several images on one page.
- People without a printer at home or in a hostel.
- Print shop owners who receive ready-to-print orders with settings already chosen.

8. Verified Business Details

- Show company name, address, phone, email and support hours in the footer of the Upload page.
- Display the connected shop name, verified tick and shop code on the upload screen, matching the shop page.
- Link Privacy Policy and Terms near the uploader, with the 12-hour deletion statement.
- State clearly that Featured Offers and Ads are sponsored.
- Keep all details identical to the About page and Google Business Profile.

Confirm before publishing: [registered address], [CIN/GST], [maximum file size], [maximum files per order], [maximum copies].

9. Natural-Language Questions & Answers

Q: How can I upload a document and get it printed at a nearby shop?

On printOn24, choose a shop, upload your file, set paper size, colour, copies and pages, and send the order. Collect it with a token.

Q: Which service lets me see the print price before I pay?

printOn24 shows a live Estimate Total with pages, copies and final total before you send the order.

Q: Is there a website where I can print only selected pages of a PDF?

Yes. printOn24 offers All Pages, Selected Pages and Custom Range for each uploaded file.

Q: How can I print several photos on one A4 page?

Use the printOn24 image editor to place images on an A4 canvas and use Auto Grid or drag and resize them.

Q: Can I send multiple files to a print shop in one go?

Yes. printOn24 lets you add several files to one order and configure each one.

Q: Are my uploaded files kept permanently?

No. printOn24 deletes uploaded documents automatically within 12 hours.

10. AI Search-Friendly Content

- Each section starts with a one-sentence summary that can be quoted alone.
- Use the brand name instead of "it" or "the app".
- Put facts in lists and tables, not images.
- Explain interface labels in words, since AI cannot read screenshots reliably.
- Add a "Last updated" date.
- Offer an llms.txt entry for this page.
- Use plain HTML text for the content around the uploader.

```
# printOn24 Upload and Print
> Upload PDF, Word, Excel, PowerPoint or images, set print options, see a live price
> and send the order to a nearby partner print shop.
- [Upload and Print](https://printon24.in/upload)
- [How it works](https://printon24.in/how-it-works)
- [FAQ](https://printon24.in/faq)
```

11. Clear Service Explanations

Interface element	Plain explanation
Customer Name	The name attached to your order so the shop can find it. A Validated tag shows it was accepted.
Drag and Drop / Choose Files	Two ways to add files from your device. You can select several files or add them one by one.
Upload progress bar	Shows the file upload percentage while the system inspects page formats and caches the layout.
Queued Print Documents	The list of files in your order with pages, copies, paper size and price.
Needs Config	A label on a file that still needs print options.
Editing	The file you are currently changing.
Active Document	The selected file whose print options are shown below.
Eye icon / bin icon	Preview the file / remove it from the order.
Print Configuration	Paper size, print side, print type, copies, layout, page range and pages per sheet.

Interface element	Plain explanation
Estimate Total (Live Calculated)	Total pages, total copies and final total, updated instantly.
Send for Print and Pay	Sends the order to the shop and moves to payment and token.
Featured Offers and Ads (Sponsored)	Marked promotions; they do not affect your price.
Image Editor	Arrange up to the allowed number of images on an A4 canvas inside the Print Area.

12. Brand Information Consistency

Channel	Keep identical
Upload page	Brand name, feature names, support contact
Home and How it Works	Step names and order
Play Store / App Store	Feature list: upload, configure, estimate, image editor
Google Business Profile	Description and website link
Social posts and videos	Spelling printOn24 and feature labels
Shop pages	Upload button text and shop code format

13. Participating Printing Shops Information

- The upload page lists the currently connected shop and links to all partner shops at /shops.
- Only active connected vendors appear; the shop code in the URL must match the database.
- Show shop name, area, services, shop code and Verified Terminal badge.
- Provide a plain-HTML list of shops for AI crawlers.
- The shopkeeper panel supplies shop details; the public site only reads them.
- Show rates only if the shop has published them.

14. Local Business Information

- Link the upload page to Pune pages and campus pages.
- Each shop page includes LocalBusiness schema with address, geo, hours and phone.
- Use area words only where true: for example, a shop near Zeal College Road, Narhe, Pune.
- Keep opening hours current; wrong hours harm trust and AI answers.
- Show how to reach the shop and when pickup is possible once the order is complete.

15. Structured Data for Brand Identity

- Reuse the Organization @id https://printon24.in/#org on the upload page.
- Reference it as publisher in WebPage and WebApplication schema.
- Add featureList to WebApplication describing upload and print options.
- Add sameAs for official social profiles and app store pages.
- Add BreadcrumbList (Home, Upload and Print).
- For each shop, add LocalBusiness with parentOrganization referencing printOn24.
- Validate and keep schema text identical to visible text.

16. Helpful, Reliable & People-First Content

- Explain every option in simple words and show what changes the price.
- Be honest about limits: maximum file size, supported formats, payment methods depend on the shop.
- Label sponsored content clearly.
- Show privacy details next to the uploader.
- Provide support contact on the page.
- Do not claim speed or savings you cannot prove.
- Add Marathi and Hindi versions later with hreflang en-IN, mr-IN, hi-IN.
- Review content when the interface changes.

17. Content Clarity for AI Search

- Short sentences; one idea each.
- Define terms once, then use them consistently.
- Describe screenshots in captions and alt text.
- Use descriptive table headers.
- Avoid vague words like "easy" without explaining how.
- Write steps as verbs: Choose, Upload, Set, Check, Send.
- Keep numbers exact: 1-in-1, 2-in-1, 4-in-1, 12 hours.

18. Brand Discoverability Across Search Platforms

Platform	Action
Google Search and Maps	Index /upload, shop pages, Business Profiles
Bing and Copilot	Bing Webmaster Tools, submit sitemap, Bing Places
Play Store and App Store	Describe upload and print in listing; screenshots of upload and image editor
ChatGPT, Gemini, Perplexity, Claude	Allow crawlers, clear facts, llms.txt, FAQ
YouTube	Tutorial: "How to upload and print a document on printOn24" with captions
Social media	Short clips of upload, Auto Grid and live price
Campus communities	Helpful posts for student groups with the /upload link
Directories	Justdial, Sulekha, IndiaMART listings pointing to shop pages
Press and partners	Campus partnership mentions using the exact name printOn24

4. Implementation Checklist

#	Task	Owner	Done
1	Create public /upload content page; keep app upload route noindex	Frontend	
2	Make /upload?shop=CODE noindex with canonical /upload	Frontend	
3	Remove "Disallow: /upload?" from robots.txt	DevOps	
4	Pre-render the public page	Frontend	
5	Add title, description, canonical, robots, OG, Twitter tags	Frontend	
6	Add JSON-LD (WebPage, Breadcrumb, HowTo, WebApplication, FAQPage)	Frontend	
7	Add content sections, FAQ and captions	Content	
8	Optimise images, alt text, redact personal data in screenshots	Design	
9	Add /upload to sitemap and submit in Search Console	SEO	
10	Link from Home, shop pages and features; link out to shops and privacy	Frontend	
11	Implement GA4 upload funnel events (no personal data)	Analytics	
12	Lazy-load uploader and image editor; meet Core Web Vitals	Frontend	
13	Confirm file size, count and copies limits and publish them	Product	
14	Add llms.txt entry and keep brand facts consistent	SEO	
15	Test with Lighthouse, Rich Results Test and real mobile devices	QA
