printOn24

Home Page: SEO, AEO and GEO Content Pack

Page: https://printon24.in/ (public landing Home page)
Covers: 26 SEO topics, 14 AEO topics, 18 GEO topics
Prepared: 29 October 2026

How to use this document. Text in [square brackets] is a placeholder that must be replaced with real business data (address, founding year, social links, numbers). Do not publish invented ratings, user counts or reviews. The logged-in app Home screen (Hello Sanket, Recent Print History) must not be indexed; this content is for the separate public landing Home page. The existing app UI and functionality are not changed. All facts below come from the approved PrintOn24 screens: A4/A3/A2, single or back to back, colour or B&W, copies, portrait or landscape, page range, 1/2/4 pages per sheet, Pay on Counter, token, digital receipt with barcode, live queue status, memberships, reports, notifications, nearby shops (1 km / 5 km), image editor, 12-hour document deletion, DPDP Act 2023, support phone and email.

Contents

1. SEO (Search Engine Optimization), topics 1 to 26
2. AEO (Answer Engine Optimization), topics 1 to 14
3. GEO (Generative Engine Optimization), topics 1 to 18
4. Implementation checklist

1. SEO (Search Engine Optimization)

1. Meta Title

The title is the clickable headline in Google results. Keep it under about 60 characters so it is not cut, put the primary keyword first and add the brand at the end.

Recommended (use this):

```
printOn24 - Online Printing at Nearby Print Shops in Pune
```

Alternatives for A/B testing:

- Print Documents Online Near You | Upload, Pay and Collect - printOn24
- printOn24: Upload and Print at a Nearby Xerox Shop (No Queue)
- Online Print Order in Pune - Collect with a Token | printOn24

Rule: one unique title per page, no keyword stuffing, no all caps. The Home title must not be reused on other pages.

2. Meta Description

The description is the snippet under the title. Aim for 140 to 160 characters, include the main benefit, one keyword and a call to action. It does not directly rank, but it raises click-through rate.

Recommended:

```
Upload your document, choose a nearby partner print shop, set colour, copies and page range, and
    collect your printout with a token. No queues. Try printOn24 in Pune.
```

Alternatives:

- Print online without standing in a queue. Upload PDF, Word or images, see the live price and collect from a nearby print shop with a token.
- Find a nearby xerox and print shop, send your file online and pick it up when it is ready. Colour, B&W, A4, A3 and A2 supported.

3. Primary Keywords

Primary keywords describe the core service and are used in the title, H1, first paragraph and the main sections of the Home page.

Keyword	Intent	Where to use
online printing	Informational / commercial	Title, H1, intro, hero
print documents online	Transactional	H1, How it Works, CTA
printing shop near me	Local / transactional	Shops section, Local SEO block
xerox shop near me	Local	Shops section, FAQ
online print order	Transactional	Features, FAQ
printOn24	Brand / navigational	Title, schema, footer, About

4. Secondary Keywords

Secondary keywords support the primary ones and appear naturally in feature blocks, FAQs and image alt text.

- upload and print
- print shop QR code

- colour print online
- black and white print online
- student printing service
- campus printing Pune
- document printing Pune
- print on counter payment
- digital print receipt
- print token pickup
- A3 / A4 / A2 print online
- double side printing online
- print selected pages
- multiple pages on one sheet
- photo print from mobile
- assignment printing
- resume printing
- thesis printing
- lab journal printing
- nearby print shops map

5. Long-Tail Keywords

Long-tail phrases have lower volume but higher intent and are easier to rank for. Use them as H3 headings, FAQ questions and section copy.

- how to print a document online without going to a shop
- online printing service for students in Pune
- upload PDF and collect printout from nearby xerox shop
- print assignment online near me
- print shop near PICT / COEP / MIT / Sinhgad campus
- print from mobile and pay at the counter
- secure document printing with auto delete after 12 hours
- print only selected pages of a PDF online
- print colour and black and white pages in one order
- how to print photos on one page from phone
- get a digital receipt for a print order
- xerox shop with online upload and token system
- best way to print without a printer at home
- order print before reaching the shop

6. H1, H2 & H3 Headings

Use exactly one H1. H2s are the main sections and H3s are the sub-points. Headings should read like natural phrases that contain keywords.

```
H1: Print Online. Collect at a Nearby Print Shop.
  H2: What is printOn24?
  H2: How printOn24 Works
    H3: Step 1 - Find or Scan Your Print Shop
    H3: Step 2 - Upload Your Documents
    H3: Step 3 - Choose Your Print Settings
    H3: Step 4 - Check the Price and Place the Order
    H3: Step 5 - Collect Your Printout with a Token
  H2: Features of printOn24
    H3: Complete Print Configuration
    H3: Supported File Types
    H3: Built-in Image Editor
    H3: Live Price Estimate
    H3: Pickup Token and Digital Receipt
    H3: Live Order Status and Notifications
    H3: Memberships and Discounts
    H3: Reports and Print History
    H3: Find Nearby Print Shops
  H2: Find Partner Print Shops Near You
  H2: Who Uses printOn24?
  H2: printOn24 vs a Traditional Xerox Shop
  H2: Your Documents Stay Private
  H2: Frequently Asked Questions
  H2: Become a Partner Print Shop
  H2: About printOn24
  H2: Contact Us
```

7. Home Page Content Optimization

Complete content for the public Home page, section by section. Word count target for the full page: 1,200 to 1,800 words.

Hero (above the fold)

H1: Print Online. Collect at a Nearby Print Shop.

Upload your document, choose your print settings and send the order to a verified partner print shop near you. You get a pickup token and a digital receipt, so you can collect your printout without waiting in a queue. Buttons: Find a Print Shop, Upload and Print Now.

What is printOn24?

printOn24 is an online printing platform that connects customers with partner printing and xerox shops. You upload a file from your phone or laptop, set paper size, colour, sides, copies and page range, and send the order directly to the shop you choose. The shop prints it and you collect it with a token. There is no need to share files on pen drives or messaging apps, and no need to explain settings at the counter.

How printOn24 works

1. Find or scan your print shop. Search a shop by name, open a shop link or scan the shop QR code. The shop is selected automatically. You can also type a shop code.
2. Upload your documents. PDF, Word, Excel, PowerPoint and image files are supported, and you can add more than one file to an order.
3. Choose your print settings. Paper size A4, A3 or A2, single side or back to back, colour or black and white, copies, portrait or landscape, all pages, selected pages or a custom range, and 1, 2 or 4 pages per sheet.
4. Check the price and place the order. The estimated total updates live. Choose a payment method enabled by the shop, such as Pay on Counter.
5. Collect with a token. You get a pickup token and a digital receipt with a barcode. Show the token at the counter to collect your prints.

Features

- Complete print configuration before you pay
- Image editor to place several images on one page
- Live price estimate with total pages, copies and final amount
- Digital receipt with barcode, token and short-view receipt
- Live order status (Queued, Completed) and notifications
- Memberships with flat discounts, priority and monthly quota
- Reports with pages printed, total spent and average order value
- Nearby shops on a map within 1 km or 5 km
- Saved default print preferences in your profile

Who uses printOn24

Students printing assignments, lab reports, theses and ID documents; job seekers printing resumes and certificates; offices and professionals printing everyday documents; and print shop owners who want online orders and fewer counter queues.

Privacy

Uploaded files are stored in encrypted cloud storage and automatically deleted within 12 hours. printOn24 follows the Digital Personal Data Protection Act, 2023.

Call to action blocks

- Find a Print Shop near you
- Upload and Print Now
- Partner with printOn24 (for shop owners)
- Contact support: +91 9284289782, info@hrsactech.in

On-page rules: primary keyword in the first 100 words; use keywords naturally, never repeat the same phrase unnaturally; short paragraphs (2 to 4 lines); bullets and tables for scannability; every claim must be true and verifiable.

8. Service-Based Keywords

Service	Keyword variants
Document printing	online document printing, print PDF online, print Word/PPT/Excel online
Colour printing	colour print online, colour print near me, colour printout Pune
Black and white printing	B&W print online, black and white xerox near me, cheap B&W print
Xerox / photocopy	xerox shop near me, photocopy near me, xerox online order
Paper sizes	A4 print online, A3 print near me, A2 print Pune
Double-side printing	back to back printing online, duplex printing near me
Multi-page layouts	2-in-1 print, 4-in-1 print, save paper printing
Student printing	assignment printing, thesis print, journal print, campus print shop
Photo / image printing	print photos on one page, ID photo print layout
Print by token	print and collect with token, no queue printing

Use these as feature headings, internal link anchors and shop page copy. Do not repeat all of them on the Home page; spread them across Home, Features, How it Works and shop pages.

9. Image SEO (Alt Tags, Image Names)

Image	File name	Alt text
Logo	printon24-logo.svg	printOn24 online printing platform logo
Hero	online-printing-nearby-print-shop.webp	Student uploading a document on printOn24 to print at a nearby shop
QR / shop select	scan-print-shop-qr-code.webp	Scanning a print shop QR code on printOn24
Upload screen	upload-document-print-settings.webp	printOn24 upload screen with paper size, colour and copies options
Print settings	print-configuration-a4-colour-copies.webp	Print configuration with page range, layout and live price on printOn24
Image editor	image-editor-multiple-images-one-page.webp	Image editor placing several images on one printable page
Receipt	digital-print-receipt-token.webp	printOn24 digital receipt with pickup token and barcode
Nearby shops	nearby-print-shops-map.webp	Map of nearby partner print shops on printOn24
Reports	print-report-analytics.webp	printOn24 report showing pages printed and money spent
Open Graph	home-1200x630.png	printOn24 online printing at nearby print shops

- Use WebP or AVIF, compress below 150 KB where possible.
- Always set width and height to avoid layout shift.
- Lazy-load everything except the hero image; give the hero fetchpriority="high".
- Decorative images use alt="" ; do not stuff keywords into alt.
- Describe the screen or the action, not just "image of app".

10. Meta Tags

```
<html lang="en-IN">
<meta charset="utf-8">
<meta name="viewport" content="width=device-width, initial-scale=1">
<title>printOn24 - Online Printing at Nearby Print Shops in Pune</title>
<meta name="description" content="Upload your document, choose a nearby partner print shop, set
    colour, copies and page range, and collect your printout with a token. No queues.">
<meta name="author" content="printOn24 Technology Pvt. Ltd.">
<meta name="theme-color" content="#FF1200">
<meta name="geo.region" content="IN-MH">
<meta name="geo.placename" content="Pune">
<meta name="keywords" content="online printing, print documents online, printing shop near me,
    xerox shop near me, printOn24">
```

Google ignores the keywords meta tag; it is optional. Title, description, viewport, language and canonical matter most.

11. Open Graph Tags

Control how the link looks when shared on WhatsApp, Facebook, LinkedIn and Slack.

```
<meta property="og:type" content="website">
<meta property="og:site_name" content="printOn24">
<meta property="og:title" content="printOn24 - Print Online. Collect at a Nearby Print Shop.">
<meta property="og:description" content="Upload, configure and send your print order to a verified
    print shop near you. Collect with a token.">
<meta property="og:url" content="https://printon24.in/">
<meta property="og:image" content="https://printon24.in/og/home-1200x630.png">
<meta property="og:image:width" content="1200">
<meta property="og:image:height" content="630">
<meta property="og:image:alt" content="printOn24 online printing at nearby print shops">
<meta property="og:locale" content="en_IN">
```

12. Twitter/X Card Tags

```
<meta name="twitter:card" content="summary_large_image">
<meta name="twitter:title" content="printOn24 - Print Online. Collect at a Nearby Print Shop.">
<meta name="twitter:description" content="Upload, configure and send your print order to a
    verified print shop near you.">
<meta name="twitter:image" content="https://printon24.in/og/home-1200x630.png">
<meta name="twitter:image:alt" content="printOn24 online printing at nearby print shops">
<meta name="twitter:site" content="@[handle]">
```

13. Canonical URL

```
<link rel="canonical" href="https://printon24.in/">
```

- Choose one version (https and either www or non-www) and 301-redirect all others.
- Home canonical must be the clean root URL, even when opened with ?utm_source=... or ?ref=... parameters.
- Each page has its own self-referencing canonical; never point every page to Home.
- Shop pages: canonical is the shop page URL itself.

14. Robots Meta Tag

Public Home page:

```
<meta name="robots" content="index, follow, max-image-preview:large, max-snippet:-1">
```

Private or transactional routes (login, app Home, upload, checkout, receipts, profile, settings, notifications):

```
<meta name="robots" content="noindex, nofollow">
```

Do not block a page in robots.txt AND rely on noindex; Google must be able to crawl a page to see its noindex tag.

15. XML Sitemap

Location: https://printon24.in/sitemap.xml. Submit it in Google Search Console and Bing Webmaster Tools. Include only indexable, canonical, 200-status URLs.

```
<?xml version="1.0" encoding="UTF-8"?>
<urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9">
  <url><loc>https://printon24.in/</loc><lastmod>2026-10-29</lastmod><priority>1.0</priority></url>
  <url><loc>https://printon24.in/how-it-works</loc></url>
  <url><loc>https://printon24.in/features</loc></url>
  <url><loc>https://printon24.in/shops</loc></url>
  <url><loc>https://printon24.in/shops/pune</loc></url>
  <url><loc>https://printon24.in/shops/pune/[shop-slug]</loc></url>
  <url><loc>https://printon24.in/faq</loc></url>
  <url><loc>https://printon24.in/about</loc></url>
  <url><loc>https://printon24.in/contact</loc></url>
  <url><loc>https://printon24.in/partner</loc></url>
  <url><loc>https://printon24.in/privacy-policy</loc></url>
  <url><loc>https://printon24.in/terms-and-conditions</loc></url>
</urlset>
```

Shop page URLs are generated from the shared database and include only active, connected vendors. When a vendor is disconnected, remove it from the sitemap and return noindex or 410 for its page. Update lastmod only on real content changes.

16. Robots.txt

```
User-agent: *
Allow: /
Disallow: /app/
Disallow: /checkout
Disallow: /receipt
Disallow: /upload?
```

```
Disallow: /api/

Sitemap: https://printon24.in/sitemap.xml
```

> Do not block AI and answer-engine crawlers (GPTBot, OAI-SearchBot, ClaudeBot, PerplexityBot, Google-Extended) on public pages if you want to appear in AI answers.

17. Internal Linking

From Home	To	Suggested anchor text
Hero button	/shops	Find a Print Shop
Hero button	/upload	Upload and Print Now
How it Works	/how-it-works	See the full printing process
Features	/features	Explore all printOn24 features
Shops block	/shops/pune	Print shops in Pune
Shops block	/shops/pune/[area]	Print shops near [PICT / COEP / MIT]
FAQ section	/faq	More printing questions answered
Partner block	/partner	Partner with printOn24
Privacy block	/privacy-policy	Privacy Policy
Footer	/about, /contact, /careers, /terms-and-conditions	About us, Contact, Careers, Terms

- Use descriptive anchors, not "click here".
- Every shop page links back to /shops and Home.
- Keep important pages within 3 clicks of Home.
- Use real <a href> links, not onClick-only buttons, so crawlers can follow them.

18. Technical SEO

- **Rendering:** a plain client-side React SPA sends an empty HTML shell. Pre-render public pages with Next.js SSR/SSG, vite-plugin-ssg, react-snap or a prerender service so content and tags exist in the first HTML response.
- **Head management:** use react-helmet-async (or Next.js Metadata) for title, description, canonical, OG and JSON-LD per route.
- **Status codes:** 200 for live pages, 301 for moves, 404 for missing, 410 for removed shops. No soft 404s.
- **HTTPS** everywhere with HSTS; redirect http to https.
- **One H1**, semantic landmarks (header, nav, main, section, footer).
- **Clean routing:** use history routing, not hash (#) URLs, for public pages.
- **Separate concerns:** user panel, shopkeeper panel and super admin stay separate apps. Only the public site reads vendor data from the shared database.
- **Log monitoring:** check crawl errors and 5xx weekly.

19. Mobile SEO

- Google uses mobile-first indexing, so the mobile page must contain the same content as desktop.
- Viewport meta tag set; no horizontal scrolling.

- Tap targets at least 44 px; body font at least 16 px.
- Primary CTA (Upload and Print Now) visible without scrolling.
- No intrusive popups covering content on load.
- Test with Lighthouse mobile and Search Console Page Experience.
- For the React Native app: add Android App Links and iOS Universal Links so a shop link opens directly in the app on /upload?shop=[SHOP_CODE].

20. Page Speed Optimization

Metric	Target
LCP (largest content)	under 2.5 s
INP (interaction)	under 200 ms
CLS (layout shift)	under 0.1

- Serve hero as WebP/AVIF with fetchpriority="high" and correct size for mobile.
- Self-host fonts, use font-display: swap, preload the main font.
- Code-split routes; keep the public Home bundle small and separate from the app bundle.
- Enable Brotli/Gzip, long cache headers and a CDN.
- Defer analytics and third-party scripts.
- Reserve space for images and embeds to avoid layout shift.
- Lazy-load map and below-the-fold sections.

21. URL Structure

```
/                                Home
/how-it-works                    Process page
/features                        Features page
/shops                           All partner shops
/shops/pune                      City page
/shops/pune/viman-nagar          Area page
/shops/pune/yash-enterprises     Individual shop page
/faq   /about   /contact   /partner   /careers
/privacy-policy   /terms-and-conditions
/upload?shop=PUNE-HE-01          Deep link (noindex, not in sitemap)
```

- Lowercase, hyphen-separated, short, readable, no IDs or underscores.
- Keep depth at three levels or fewer.
- Never change a live URL without a 301 redirect.
- The shop code query parameter is for the deep link only and is excluded from indexing.

22. Structured Data / Schema Markup

Add JSON-LD in the Home page head. FAQPage content must match the visible FAQ. Do not add fake review or rating markup.

```
{
 "@context":"https://schema.org",
 "@graph":[
  {"@type":"Organization","@id":"https://printon24.in/#org",
   "name":"printOn24","legalName":"printOn24 Technology Pvt. Ltd.",
   "url":"https://printon24.in/","logo":"https://printon24.in/logo.png",
   "email":"info@hrsactech.in","telephone":"+91-9284289782",
   "address":{"@type":"PostalAddress","addressLocality":"Pune",
              "addressRegion":"Maharashtra","addressCountry":"IN"},
```

```
   "areaServed":{"@type":"City","name":"Pune"},
   "knowsAbout":["online printing","document printing","student printing"],
   "sameAs":["[LinkedIn URL]","[Instagram URL]","[X URL]"]},
  {"@type":"WebSite","@id":"https://printon24.in/#website",
   "url":"https://printon24.in/","name":"printOn24","inLanguage":"en-IN"},
  {"@type":"WebApplication","name":"printOn24",
   "applicationCategory":"BusinessApplication",
   "operatingSystem":"Web, Android, iOS"},
  {"@type":"HowTo","name":"How to print a document online with printOn24",
   "step":[{"@type":"HowToStep","name":"Find your print shop"},
           {"@type":"HowToStep","name":"Upload your documents"},
           {"@type":"HowToStep","name":"Choose print settings"},
           {"@type":"HowToStep","name":"Place the order"},
           {"@type":"HowToStep","name":"Collect with a token"}]},
  {"@type":"FAQPage","mainEntity":[
    {"@type":"Question","name":"What is printOn24?",
     "acceptedAnswer":{"@type":"Answer","text":"printOn24 is an online printing platform
    ..."}}]}
 ]}
```

Validate with the Rich Results Test and the Schema Markup Validator before release.

23. Local SEO

- Create and verify a Google Business Profile for printOn24 and for each partner shop; set the shop website field to its printOn24 shop page.
- Keep Name, Address and Phone (NAP) identical on the website, profile and directories.
- Add a "Print shops in Pune" block on Home and link to /shops/pune and area pages.
- Create campus and area pages: print shops near PICT, COEP, MIT, Sinhgad, Viman Nagar, Kothrud and so on.
- List on Bing Places, Apple Business Connect, Justdial, Sulekha and IndiaMART.
- Use LocalBusiness schema with geo coordinates on shop pages.
- Encourage genuine Google reviews from real customers; never buy or fabricate reviews.
- Embed or link a map with the shop location.

24. Individual Printing Shop Pages SEO

Every connected vendor gets a unique indexable page. Template:

Element	Template
URL	/shops/{city}/{shop-slug}
Title	{Shop Name} - Print and Xerox in {Area}, {City} | printOn24
Description	Upload your file online and print at {Shop Name}, {Area}. Colour and B&W, A4/A3. Collect with a token. Open {timings}.
H1	{Shop Name} - Online Printing in {Area}
Content	About the shop, address, timings, services, B&W and colour rates, shop code, QR code, map, "Upload and Print" button
Deep link	Button opens /upload?shop={SHOP_CODE}, so the user does not scan or type a code
Schema	LocalBusiness with address, geo, openingHours, telephone, url
FAQ	3 to 5 shop-specific questions (timings, rates, services)
Internal links	Back to /shops, /shops/{city}, and Home

- Only vendors connected to printOn24 get a page; disconnected shops return noindex or 410.

- Write unique text per shop; copy-pasted pages create duplicate content.
- Data comes from the shared database that the shopkeeper panel already fills.

25. Google Search Console

1. Add a Domain property and verify through DNS.
2. Submit https://printon24.in/sitemap.xml.
3. Use URL Inspection on the Home page, then Request Indexing.
4. Check the Pages report for excluded or errored URLs.
5. Monitor Core Web Vitals and Mobile Usability.
6. Review Enhancements for FAQ, HowTo and structured data errors.
7. Check Performance: queries, pages, countries, devices.
8. Set up email alerts for critical issues.

Also set up Bing Webmaster Tools and import the site from Search Console.

26. Google Analytics & SEO Performance Tracking

Install GA4 and link it to Search Console. Track these events:

Event	Fires when
click_find_shop	User taps Find a Print Shop
click_upload_now	User taps Upload and Print Now
shop_selected	User opens a shop deep link
upload_started	First file upload begins
order_placed	Order sent to shop
partner_signup_click	Shop owner taps Partner with us
faq_expand	FAQ item opened

KPI	Review cadence
Impressions, clicks, CTR, average position	Weekly
Branded vs non-branded queries	Weekly
Organic landing pages and orders from organic	Monthly
Top shop pages by clicks and orders	Monthly
Core Web Vitals	Monthly
Indexed pages vs sitemap pages	Monthly
Referral from Google Business Profile	Monthly

Use UTM parameters only on campaigns (posters, QR, ads), never on internal links.

2. AEO (Answer Engine Optimization)

AEO helps Google featured snippets, People Also Ask, voice assistants and AI answer boxes pick your page as the answer. Write each answer so it can stand on its own.

1. Frequently Asked Questions (FAQs)

Q: What is printOn24?

printOn24 is an online printing platform. You upload a document, choose a nearby partner print shop, set your print options and collect the printout using a pickup token.

Q: How do I print a document online with printOn24?

Find your print shop, upload your file, choose paper size, colour, sides, copies and page range, place the order, then show your token at the shop to collect the printout.

Q: Do I need to scan a QR code?

No. You can open a shop link or search the shop by name. Scanning the shop QR code or entering the shop code also works and selects the same shop.

Q: Which file types can I print?

PDF, Word, Excel, PowerPoint and image files. You can add more than one file to an order.

Q: How do I pay?

You pay using the methods enabled by the print shop you choose, for example Pay on Counter when you collect your prints. Available methods are shown at checkout.

Q: How much does printing cost?

The price depends on the shop rates, paper size, colour or black and white, and the number of pages and copies. A live estimated total is shown before you send the order.

Q: Can I print only some pages?

Yes. Choose All Pages, Selected Pages or a Custom Range. You can also fit 1, 2 or 4 pages on one sheet.

Q: Can I print on both sides of the paper?

Yes. Choose Single Side or Back to Back in the print settings.

Q: Is my document safe on printOn24?

Uploaded documents are kept in encrypted cloud storage and are automatically deleted within 12 hours, as described in the Privacy Policy.

Q: How do I know when my print is ready?

You get a notification when the shop completes the print and the order status changes from Queued to Completed. Show your token at the counter to collect.

Q: Can I get a receipt for my order?

Yes. Each order has a digital receipt with a barcode and token. You can download, copy, share or re-print it.

Q: Can I find print shops near me?

Yes. printOn24 shows partner shops near you with address, timings, services and rates, and you can connect to a shop with one tap.

Q: Can my print shop join printOn24?

Yes. Print and xerox shops can register as partners to receive online orders and get a shop code, QR code and shop page.

Q: Is printOn24 only for students?

No. Students are a major group, but anyone who needs documents printed can use printOn24.

Q: How is printOn24 different from a normal xerox shop?

A normal shop needs you to share files and explain settings at the counter. With printOn24 you upload and configure online, see the price first and collect with a token without waiting.

Q: How can I contact printOn24 support?

Call +91 9284289782 or email info@hrsactech.in. Support is available 7 days a week.

2. Question-Based Keywords

Type	Examples
What	what is printOn24, what is online printing, what files can I print online
How	how to print a document online, how to print from mobile, how to print selected pages, how to get a print receipt
Where	where can I print near me, where to print assignments near my college
Can	can I print without going to a shop, can I pay at the shop after uploading
Which	which print shop is nearest, which paper sizes are available
Why	why use online printing, why is my document deleted after 12 hours
How much	how much does colour printing cost, how much is a B&W print per page

3. Direct Answers to User Queries

Open each answer with the answer itself in the first sentence (40 to 60 words), then add detail below.

- **Query:** how to print a document online near me. **Answer:** Open printOn24, choose a nearby partner print shop, upload your file, set your options and send the order. Collect the printout with your token at the shop.
- **Query:** can I print without a printer. **Answer:** Yes. Upload your file on printOn24 and a nearby partner print shop prints it for you. You pay as the shop allows, such as at the counter, and collect it with a token.
- **Query:** how long is my file stored. **Answer:** Documents uploaded to printOn24 are automatically deleted within 12 hours of creation.

4. How-to Questions & Answers

How to print a document online

1 Open printOn24 and select your print shop (search, link or QR).

2 Tap Upload and choose your file.

3 Choose paper size, colour, sides, copies and page range.

4 Review the live total and tap Send for Print and Pay.

5 Pick the payment method and place the order.

6 Show your token at the counter and collect your prints.

How to print selected pages only

1 Upload the document.

2 In Page Range choose Selected Pages or Custom Range.

3 Enter the pages, for example 1-3, 7.

4 Check that the total pages and price update.

How to save paper

1 Choose Back to Back (double side).

2 Set Pages Per Sheet to 2-in-1 or 4-in-1.

3 Use Black and White if colour is not needed.

How to print several photos on one page

1 Upload the images.

2 Open the image editor.

3 Use Auto Grid or drag and resize each image on the canvas.

4 Confirm the paper size and send the order.

How to find a nearby print shop

1 Open Profile and Find Nearby Print Shops.

2 Choose a 1 km or 5 km radius.

3 Tap a shop to see address, timings and rates.

4 Tap Connect with this shop.

5. Service-Related Questions & Answers

Question	Answer
Do you offer colour and B&W printing?	Yes. Choose Colour or Black and White for each order.
Which paper sizes are available?	A4, A3 and A2, depending on what the shop supports.
Can I print landscape documents?	Yes. Choose Portrait or Landscape in Layout.
Can I print multiple copies?	Yes. Set the number of copies; the total updates immediately.
Can I pay at the shop?	Yes, where the shop enables Pay on Counter.
Is there a membership?	Partner shops can offer memberships with flat discounts, queue priority, monthly quota and no convenience charges.
Can I re-print an old order?	Yes. Use Re-Print on the receipt screen.
Can I track my spending?	Yes. The Reports section shows pages, total spent, downloads and average order value.

6. Conversational Search Queries

People and voice assistants ask in full sentences. Use these as FAQ and heading phrasing:

- "Where can I print my assignment right now?"
- "Is there an app to send my document to a xerox shop?"
- "Print shop near my college with online upload"
- "Can I upload my PDF and pay when I reach the shop?"
- "I need colour printouts in 10 minutes, what should I do?"
- "Which xerox shop near me accepts online orders?"
- "Hey Google, find a print shop near me"

7. Featured Snippet Optimization

- **Paragraph snippet:** a 40 to 50 word definition directly under the H2 "What is printOn24?".
- **List snippet:** the numbered 5-step process under "How printOn24 Works".
- **Table snippet:** the comparison of a traditional shop vs printOn24.

What matters	Traditional shop	printOn24
Sending the file	Pen drive, messaging app or email at the counter	Upload from phone or laptop
Print settings	Explained verbally	Chosen by you before ordering
Price	Known only at the counter	Live estimate before you send
Waiting	Stand in the queue	Order ahead and collect with a token
Proof of order	Often none	Digital receipt with barcode

8. Clear and Concise Answers

- One question, one answer.
- First sentence answers the question; the next sentences add detail.
- Prefer 40 to 60 words for answers, 5 to 8 items for lists.
- Use plain words: "print", not "output the document".
- State facts with numbers (12 hours, A4/A3/A2, 1 km / 5 km).
- Avoid marketing exaggeration like "best" or "number one" unless provable.

9. Structured Content & Headings

- Put the question in an H2 or H3 and the answer immediately after.
- One topic per section; do not mix steps and features.
- Use ordered lists for processes, bullets for features, tables for comparisons.
- Use descriptive anchor IDs (#faq, #how-it-works) so answers can deep-link.
- Keep section length 80 to 200 words.

10. FAQ Content Optimization

- Keep the FAQ visible on the page (accordion content must exist in the HTML).
- Match the FAQPage schema exactly to the visible text.
- Group FAQs by theme: Getting Started, Printing Options, Payment, Privacy, Shops, Support.
- Review Search Console queries and People Also Ask each quarter and add new real questions.
- Update answers when features change and refresh the last-updated date.
- Link each answer to the relevant detailed page.

Group	Questions
Getting Started	What is printOn24, how to print online, do I need a QR code
Printing Options	file types, paper sizes, colour/B&W, page range, double side
Payment	how to pay, price, receipt
Privacy	document safety, 12-hour deletion

Group	Questions
Shops	find nearby shops, partner signup
Support	phone, email, hours

11. Search Intent Optimization

Intent	Example search	Page and CTA
Informational	how to print online	Home How it Works, /how-it-works
Navigational	printOn24, printOn24 login	Home, Open App
Local / transactional	xerox near me	/shops, Find a Print Shop
Commercial	online print service price	Features, live price estimate
Partner (B2B)	online orders for my print shop	/partner, Partner with us

The Home page carries a CTA for each intent so every visitor finds a next step.

12. Semantic Keywords

Related terms that help engines understand the topic. Use them naturally in body copy:

- print order, upload, document, file, PDF, Word, PowerPoint, Excel
- xerox, photocopy, laser print, printout, hard copy
- partner shop, shop code, QR code, terminal, counter
- token, pickup, queue, receipt, barcode, order status
- colour, black and white, A4, A3, A2, duplex, back to back, portrait, landscape
- page range, copies, pages per sheet, layout
- student, campus, assignment, thesis, journal, resume, certificate
- membership, discount, report, notification, DPDP, encrypted storage

13. User Problem-Based Content

User problem	How printOn24 solves it
Long queues at the xerox shop	Order ahead and collect with a token
File formatting changes at the shop computer	Upload and preview your file before sending
Not sure of the price	Live estimated total before ordering
Unsure how to explain print settings	Choose settings yourself in the app
No printer at home or hostel	Print at a nearby partner shop
Do not know a shop nearby	Browse nearby shops on the map
Worry about document privacy	Encrypted storage and automatic deletion within 12 hours
Lost proof of an order	Digital receipt with barcode and token
Need many photos on one page	Image editor with auto grid

14. Question-Based Content Structure

```
H2: Can I print only selected pages?
```

```
Direct answer (1-2 sentences):
  Yes. Choose All Pages, Selected Pages or a Custom Range in the print settings.
Details (list or steps):
  1. Upload the file  2. Open Page Range  3. Enter pages  4. Check price
Related link:
  /how-it-works#page-range
```

Repeat this pattern for every question on the Home page and in the FAQ.

3. GEO (Generative Engine Optimization)

GEO makes AI assistants and AI search (ChatGPT, Gemini, Perplexity, Copilot, Claude, Google AI Overviews) describe printOn24 correctly and recommend it. AI systems quote clear, consistent, verifiable text, so every fact must be the same everywhere.

1. Brand Description

printOn24 is an Indian online printing platform that connects customers with partner print and xerox shops. Users upload documents, choose print settings and send orders to a nearby shop, then collect the printout with a pickup token.

2. Short Brand Description

printOn24 lets you upload documents online and print them at nearby partner print shops, with a token for quick pickup.

Tagline: Print Online. Collect at a Nearby Print Shop.

Ultra-short (under 15 words): Online printing at nearby partner print shops in Pune.

3. Detailed Brand Description

printOn24 is an online printing platform from printOn24 Technology Pvt. Ltd., based in Pune, Maharashtra, India. Customers find a partner print shop by search, link or QR code, upload PDF, Word, Excel, PowerPoint and image files, and configure paper size (A4, A3, A2), single or back to back printing, colour or black and white, copies, portrait or landscape, page range and pages per sheet. A live estimate shows the total price before the order is sent. The order goes straight to the chosen shop. The customer receives a pickup token and a digital receipt with a barcode, follows the order status and collects the printout at the counter.

The platform consists of a user app, a shopkeeper panel for vendors and a super admin panel, sharing one backend and database. Features include nearby shop discovery, an image editor, memberships and discounts, reports, notifications and a 12-hour automatic document deletion policy under the Digital Personal Data Protection Act, 2023. printOn24 is built with High Resolution Software and Coding as technology partner.

4. Brand Entity Information

Field	Value
Brand name	printOn24
Legal name	printOn24 Technology Pvt. Ltd.
Type	Online printing platform / marketplace for print shops
Founded	[year]
Headquarters	Pune, Maharashtra, India
Address	[full registered address]
Website	https://printon24.in
Email	info@hrsactech.in
Phone	+91 9284289782 (7 days a week)
Technology partner	High Resolution Software and Coding, Pune
Platforms	Web, Android, iOS
Social profiles	[LinkedIn] [Instagram] [X] [Facebook] [YouTube]

Field	Value
Key people	[founder / team names as already shown on the About Us page]

Publish these facts on a dedicated About page and link it from the Home footer.

5. Brand Name Consistency

- Correct form: **printOn24** (lowercase p, uppercase O, no space).
- Do not use: Print On 24, PrintOn24, Printon24, Print-On-24, printon 24.
- The domain printon24.in is written lowercase in URLs only.
- Use the same name in website, app stores, Google Business Profile, schema name, social handles, press and shop pages.
- In sentences write "printOn24 lets you..." rather than "it" or "the app" so AI systems keep the entity link.

6. Business Category & Service Information

Item	Detail
Primary category	Online printing service / printing platform
Secondary categories	Xerox and photocopy service marketplace; Document printing
Services	Online document upload and print; colour and B&W printing; A4/A3/A2; double-side printing; multi-page layouts; image editor; nearby shop discovery; digital receipts; membership discounts
Business model	Customers order online; partner print shops fulfil orders at their counter
Payment	As enabled by the shop, e.g. Pay on Counter
Service area	Pune, Maharashtra (expanding)

7. Target Audience Information

- **Students:** school, college and campus users printing assignments, lab reports, journals, theses, notes and IDs (focus campuses: PICT, COEP, MIT, Sinhgad).
- **Job seekers:** resumes, certificates, application forms.
- **Professionals and small offices:** daily documents and receipts.
- **Print shop owners:** vendors wanting online orders, fewer queues, a shop code, QR code and shop page.
- **Advertisers (campus):** through the Request for Ads page.

8. Verified Business Details

- Show legal name, registered address, phone, email, support hours and company identifiers (CIN / GST if applicable) in the footer and on the About page.
- Mark partner shops with a Verified Terminal badge, matching the app.
- Keep Privacy Policy and Terms visible; they state the 12-hour deletion policy and DPDP Act compliance.
- Make details match Google Business Profile, app store listings and directory entries exactly.
- Add a visible "Last updated" date to key pages.

Placeholders to confirm before publishing: [registered address], [CIN/GST], [founded year], [social links].

9. Natural-Language Questions & Answers

Q: What is the best way to print a document if I do not have a printer?

Use printOn24: upload the file, choose a nearby partner print shop, and collect the printout there with a token.

Q: Is there an app to send a document to a xerox shop?

Yes. printOn24 lets you upload a document and send it to a partner xerox or print shop near you.

Q: Can I print from my phone and pay at the shop?

Yes. Upload from your phone and, where the shop supports Pay on Counter, pay when you collect.

Q: Which service lets me skip the queue at the print shop?

printOn24 lets you place the order in advance and pick it up with a token.

Q: Is printOn24 safe for personal documents?

Files are kept in encrypted cloud storage and deleted automatically within 12 hours.

Q: How is printOn24 different from a normal xerox shop?

You upload and configure online, see the price first and collect with a token; a normal shop requires sharing files and explaining settings at the counter.

Q: Which print shops are on printOn24 in Pune?

Partner shops are listed at printon24.in/shops/pune with address, timings, services and shop code.

10. AI Search-Friendly Content

- Write self-contained paragraphs; each paragraph should make sense if quoted alone.
- Put the key fact in the first sentence.
- Use lists and tables for facts (sizes, steps, features).
- Name the entity in full: "printOn24 provides..." instead of "it provides...".
- Include dates and "last updated" for facts that change.
- Cite verifiable specifics (12 hours, A4/A3/A2, 1 km/5 km) and avoid vague claims.
- Keep key content in HTML text, not inside images or JavaScript-only widgets.
- Publish an llms.txt file (optional) with a short site summary and links to key pages.

```
# printOn24
> Online printing platform in Pune, India. Upload documents and print at nearby partner print
    shops; collect with a token.

## Key pages
- [Home](https://printon24.in/)
- [How it works](https://printon24.in/how-it-works)
- [Partner print shops](https://printon24.in/shops)
- [FAQ](https://printon24.in/faq)
- [About](https://printon24.in/about)
```

11. Clear Service Explanations

Service	Explanation
Print configuration	Choose A4, A3 or A2, single side or back to back, colour or black and white, copies, portrait or landscape, all pages, selected pages or custom range, and 1, 2 or 4 pages per sheet.
Live price estimate	The total pages, total copies and final amount update as you change settings.
Pickup token	A unique token shown after ordering; you show it at the shop counter to collect.
Digital receipt	A receipt with barcode, token, shop, document, configuration, payment status and total; can be downloaded, copied, shared or re-printed.
Order status	Shows Queued and Completed stages and sends notifications.

Service	Explanation
Image editor	Place, resize, rotate, crop and brighten several images on one page with auto grid.
Membership	Shop-specific card with discounts, queue priority, monthly quota and no convenience charges.
Reports	Pages printed, money spent, downloads and average order value, with monthly activity chart.
Nearby shops	Map and list within 1 km or 5 km with address, timings and a Connect button.

12. Brand Information Consistency

Create one master "brand facts" document and copy from it everywhere. Check these places every quarter:

Channel	Must match
Website Home, About, footer	Name, tagline, description, address, phone, email
Google Business Profile	Same description, address, phone, categories, website link
Play Store and App Store	Short and long description, developer name
LinkedIn, Instagram, X, Facebook, YouTube	Bio, links, name spelling
Justdial, Sulekha, IndiaMART, Bing Places, Apple Business Connect	NAP and description
Partner shop pages	Brand name and shop code format
Press, partner and campus posts	Boilerplate paragraph

13. Participating Printing Shops Information

- Home shows a dynamic block "Partner print shops in Pune" from the shared database: name, area, services, shop code. Only active connected vendors.
- Full list at /shops as plain HTML (not JS-only) so AI crawlers can read it.
- Each shop page shows address, timings, services, B&W and colour rates, phone, shop code, QR code and map.
- Add ItemList schema on /shops and LocalBusiness schema on shop pages.
- Shop details are managed in the shopkeeper panel; the public site only reads them, keeping the panels separate.
- When a shop disconnects, remove it from the list and sitemap immediately.
- Do not show ratings or review counts unless they are real and stored.

14. Local Business Information

- Pune-level, area-level and campus-level pages: Print shops near PICT, COEP, MIT, Sinhgad, Viman Nagar and others.
- Each shop: full address, landmarks (for example near Zeal College Road), opening hours, phone, map link.
- Include LocalBusiness schema with geo coordinates and openingHours.
- Mention how far the shop is and the typical collect time only if verified.
- Keep location text unique per page.

```
{"@type":"LocalBusiness","name":"[Shop Name]","url":"https://printon24.in/shops/pune/[slug]",
 "telephone":"[phone]","address":{"@type":"PostalAddress","streetAddress":"[street]",
 "addressLocality":"Pune","addressRegion":"Maharashtra","postalCode":"[pin]","addressCountry":"I
    N"},
```

```
"geo":{"@type":"GeoCoordinates","latitude":[lat],"longitude":[lng]},
"openingHours":"Mo-Sa 08:00-22:00","parentOrganization":{"@id":"https://printon24.in/#org"}}
```

15. Structured Data for Brand Identity

- Use a stable @id for the Organization (https://printon24.in/#org) and reuse it on every page.
- Include name, legalName, url, logo, description, email, telephone, address, areaServed, knowsAbout, foundingDate, founder and sameAs.
- sameAs lists official profiles only: LinkedIn, Instagram, X, Facebook, YouTube, app store pages, Crunchbase, Wikidata (when available).
- WebSite and WebApplication schema reference the Organization as publisher.
- Shop LocalBusiness schema references printOn24 as parentOrganization.
- Validate regularly and keep it identical to visible page text.

16. Helpful, Reliable & People-First Content

- Write for users first: clear steps, honest limits, real prices from shops.
- Show who is behind the product (About page team and company details).
- Make privacy, terms and support easy to find.
- State what is not guaranteed (for example, payment methods depend on the shop).
- Never publish fake reviews, invented user numbers or unverifiable claims such as "number one".
- Use plain language in English now; add Marathi and Hindi versions later with hreflang (en-IN, mr-IN, hi-IN).
- Update content when features change and show the update date.
- Provide real help: tutorials, FAQs and a working support contact.

17. Content Clarity for AI Search

- Short sentences, one idea each.
- Avoid ambiguous pronouns; repeat the brand or feature name.
- Define terms once: "Token: a unique code shown after you place an order, used to collect your print."
- Use consistent terminology: always "partner print shop", "pickup token", "digital receipt".
- Use descriptive table headers and list intros ("printOn24 supports these file types:").
- Avoid text embedded in images; add the same text in HTML.
- Avoid slang and unexplained jargon.

18. Brand Discoverability Across Search Platforms

Platform	Action
Google Search and Maps	Search Console, Google Business Profile, structured data, local pages
Bing and Copilot (also feeds some AI search)	Bing Webmaster Tools, Bing Places, submit sitemap
Apple Maps and Siri	Apple Business Connect listing
Play Store and App Store	Optimised title, description, screenshots, link back to website (ASO)
ChatGPT, Perplexity, Gemini, Claude, Copilot	Allow crawlers, publish clear facts, llms.txt, get cited on reputable sites

Platform	Action
YouTube	How-to video: "How to print online with printOn24" with transcript
LinkedIn, Instagram, X, Facebook	Complete brand profiles with identical description
Directories	Justdial, Sulekha, IndiaMART, local business listings
Communities	Genuine helpful answers on Quora and Reddit; campus groups and student communities
PR and partnerships	Campus partnerships and local news coverage that mention printOn24 by exact name
Knowledge bases	Wikidata/Wikipedia only when notability criteria are met

4. Implementation Checklist

#	Task	Owner	Done
1	Create public landing Home route; keep app routes noindex	Frontend	
2	Pre-render public pages (SSR/SSG/prerender)	Frontend	
3	Add title, description, canonical, robots, OG, Twitter tags	Frontend	
4	Add JSON-LD (Organization, WebSite, WebApplication, HowTo, FAQPage)	Frontend	
5	Add Home content sections and visible FAQ	Content	
6	Optimise images (WebP, alt text, width/height)	Design	
7	Publish robots.txt and dynamic sitemap.xml	Backend	
8	Build /shops and shop pages from shared database (active vendors only)	Backend + Frontend	
9	Shop deep link /upload?shop=CODE opens upload with shop preselected	Frontend + App	
10	Set up Android App Links and iOS Universal Links	Mobile	
11	Verify Search Console and Bing Webmaster; submit sitemap	SEO	
12	Install GA4 events and link to Search Console	SEO	
13	Create/verify Google Business Profiles and directory listings	Marketing	
14	Publish About page with verified business facts; fill placeholders	Business	
15	Add llms.txt and keep brand facts consistent everywhere	SEO	
16	Test: Lighthouse, Rich Results Test, mobile usability	QA	
17	Monitor monthly and update content quarterly	SEO
